

Hala Ghazal

Web full stack developer

Recently graduated with a second-ranked in my major. Training experience in web development, strong technical and organizational abilities , specializing in both front-end and back-end development. A quick learner with a strong desire to expand my skills in web development (using Asp.net technology) and contribute to team projects by writing efficient and maintainable code. Seek a challenging career in an expanding organization and in an enthusiastic team to reach my goals and build the right career path .

Templates

- I made a templates using HTML and CSS and JavaScript.

Calculator

- I made a calculator using HTML and CSS and JavaScript

Upscale taste (02/2023 - 05/2023)

- It's a web application that connects designers who create unique, one-of-a-kind pieces with buyers through our platform. The application includes an e-commerce system where designers can sell their exclusive creations. Each designer has a dedicated profile showcasing their work, whether they specialize in interior design, home decor , or other design fields". The platform also features a gallery displaying their creations.. We built the project using "React and JavaScript to ensure a dynamic and interactive user experience (as a team).
